

Sky
Ciel
Cielo

- We are looking at the sky today...
- In all of its different stages
- To try to get a feeling of what's outside.
- The clouds will vary in density, from cover
- The clouds will vary in shade, from precipitation
- The clouds will vary in agitation, from with
- Yet they will return to their perfect position.
- And then break again, in an endless dance
- In the world's most gorgeous ballroom, the sky itself.
